Profile

Foreman Electrician with experience based in Commercial construction as well as Industrial. Takes pride in a job well done and proficiently completes the tasks at hand while working either alone or with others. Am able to manage teams of people towards completing specific tasks with the quality and care that I myself strive for, Problem solving is a strong suit of mine as I tend to try use ingenuity to overcome daily obstacles and in doing so save myself and others time without compromising the end product. Throughout my career I have always believed that hard work and an immaculate end product are the two utmost important elements of a respectable electrician and I enjoy working with companies that are able to share that vision.
